

TOP OF POLE MOUNT up to 240 SQF

CODE : SDYTP-XX

Top-of-Pole Mounts are available in several sizes up 30 modules, determined by the area of module to be mounted.

Dyco specializes in custom design and fabrication and can build mounts to meet your exact needs.

We stock custom mounts made in house. If we don't have a mount to fit your application our engineers will help design and fabricate a solution fit to your needs.

Components

- 1 Head (steel)
- 1 Main Frame (steel)
- 4* Rail Holder (anodized aluminum)
- Hardware (Stainless steel)

* or more

The **Dyco rails** are 6061-T6 anodized aluminium for harsh environments.

These rails are available in deferent lengths.

HD (heave duty) and Stainless steel module mounting hardware is provided.

Dyco top of pole mounts are made from heavy steel. The head, frame and rail holder are painted with a durable outdoor paint, these racks are available with hot-dip galvanized steel.

*Installation service available, please contact us for further details.
